INTENDED USE – CLEAR or STAINED VARNISH DECORATIVE FIRE PROTECTION for WOOD
Thermoguard Fire Varnish is a varnish with the option of a clear or stained finish for Fire Protection of timber and timber derivative substrates. The special formula provides a tough, durable finish to internal and external wood. Clear or stained finishes enhance the natural beauty of the wood while fire protecting new and previously varnished surfaces. Fire Varnish Overcoat matt or satin provide protection against UV and wear.

INTUMESCENT FIRE PROTECTION
When exposed to fire, Thermoguard Fire Varnish expands to create an insulating barrier, protecting timber surfaces from flames, heat and oxygen and suppressing emission of deadly smoke & gases.

CLEAR + STAINED VARNISH Finishes
Thermoguard Fire Varnish Overcoats are available in Clear or Stained Varnish**
Matt or Satin
- Fire Varnish basecoat available in 20 sq m
- Clear & Stained Fire Varnish Overcoat in 20 sq m + 80 sq m
** see Woodstain + Stained Varnish Colour Card on www.thermoguard.co.uk

SPECIFICATION + APPLICATION
Prepare and apply –
- 1 coat Thermoguard Fire Varnish basecoat
- 1 coat** Thermoguard Fire Varnish Overcoat (Clear or Stained)
** Fruitwoods or damp areas 2 coats FVOvercoat
EXTERNAL - 1 coat Thermoguard Fire Varnish basecoat, 2 coats Fire Varnish Exterior Overcoat
Application by painters, decorators & other professional users only. Refer to instructions on Fire Varnish Base & Overcoat containers.

PREVIOUSLY VARNISHED & STAINED SURFACES or WOOD PRESERVERS
Thermoguard Fire Varnish can be applied over firmly adhered standard clear varnish. For existing stained varnishes, stain coatings, old fire coatings or if in doubt, contact Technical Dept.
- If preservatives are required, use rapid drying clear non-water-repellent grades.**
- For tanalised or other preservative treatments, contact Technical Dept.
** Allow adequate time for stain or preservative fluids to escape.

FIRE TEST STANDARDS
in UKAS-accredited Fire Test laboratory
- BS EN Class B s2 d0 **
- Class O *
Note - For 30 or 60 mins Fire Resistance, contact Technical Dept. 01142 768008 (2)
For Doors refer to Fire Door Varnish on www.thermoguard.co.uk
** See section NEW FIRE REGULATIONS & TESTS EXPLAINED
* Class O includes Class 1.

FIRE CERTIFICATION
Thermoguard will issue a Certificate of Supply upon request for each correctly specified project for Insurance, Fire and Building Control Authority and Client Records against proof of purchase.

PREPARATION
- Cover, countersink & fill, or use non-ferrous, galvanized, stainless or sheradised fittings
- Ensure surfaces are dry, clean and free of all contamination.
- Varnished, sealed or non-porous wood should be abraded thoroughly with medium grade silicone carbide abrasive when dry to provide a good key.

CONDITIONS
During application & drying of the full system
- Ensure surfaces are thoroughly dry – max 18% moisture content.
- Maximum relative humidity RH 75%.
- Ensure adequate ventilation.
- Minimum air temperature 6°C. Minimum surface temperature 3°C above dewpoint– avoid condensation.

NEW FIRE REGULATIONS & TESTS EXPLAINED
- The new fire standard BS EN test lasts 20 mins. with airflow replaces the old BS 476 tests which lasted 10 mins and strangely restricted airflow.
- The new standard for flamespread and heat release Class B replaces Class O.
- The new BS EN tests also monitor -
  - Smoke & Gas “s” – s1 + s2 are none or very low & compliant, s3 = moderate smoke, s4 = heavy smoke.
  - Flaming Droplets or Airborne particulates – dO is none, d1 = low, d2 = moderate d3 = high levels.
For more information see www.thermoguard.co.uk “New BS EN Fire Regulations & Standards Explained”.

ENVIRONMENTAL, HEALTH & SAFETY
Thermoguard Fire Varnish basecoat, Clear & Stained Varnish Overcoat matt & satin are water-based. For application by painters, decorators & other professional users.
